

What Makes Us Unique?

We have a belief system like no other advisor

We concentrate on mitigating the downside risks so that when most other investment plans lose money, the Feddern Financial Consulting Group has the opportunity for positive returns.

As an RIA (Registered Investment Advisor) we offer participants specific advice and help in choosing investments for your investment plan based on your needs and goals. From our FIVE different risk-profiles (conservative through aggressive), each investor has the options of “I’ll Do It Myself” OR “Do It For Me.” Our group of professionals is available daily by phone and/or email.

Our investment opportunities include 40 separate, no-load Mutual Funds and ETFs along with several separately managed alternative investment opportunities. This methodology allows real diversification opportunities in futures, commodities, currencies-FOREX, options and inverse funds.

We believe that your investment decisions should be as unique as you are, and that every investor should have the Feddern Financial Consulting Group overseeing your investments on a daily basis.
